

# Context Dataflow Diagram with Visio

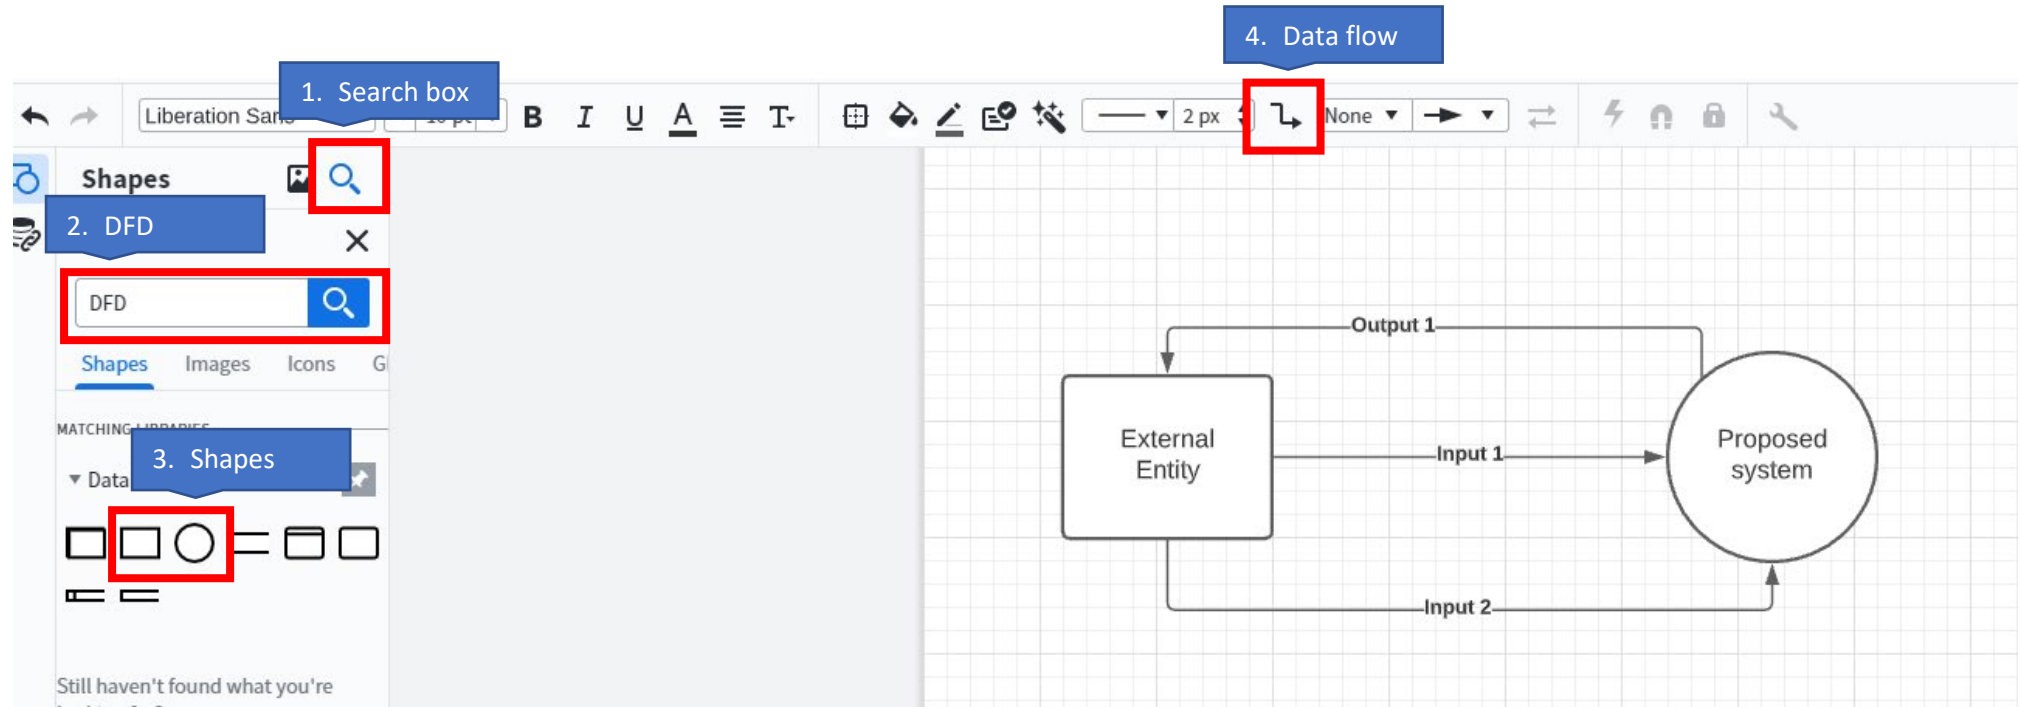

**File -> New -> Blank Drawing** and then search for shapes for Gane-Sarson under **More shapes -> Software and Database -> Software -> Gane-Sarson**

Use three shapes: Process (for the proposed system), Interface (for external entities) and Data Flow (for input/output information).

# Context Dataflow Diagram with Lucidchart

Search for Data Flow Diagram (DFD) shapes with “DFD” in the shapes search textbox. Use Circle for the system and rectangles for external entities.

## 5. Data flow label

To add text on data flow, double click on the data flow line.
