                <div class="col-lg-4">
                    <p class="text-center">A large tree, its massive trunk splintered and roots
partially uprooted, has fallen across a residential house. The branches have shattered
windows and torn through the roof, causing significant structural damage. The weight of
the tree has crushed one side of the house, leaving the walls cracked and the roof caved
in. Debris is scattered across the yard, and the house is now partially buried under the
tangled mass of leaves, branches, and broken wood. The scene is one of chaos, with the
tree looming over the damaged home, emphasizing the sheer force of nature.</p>
                </div>

```

```

        <div class="col-lg-4">
            <p class="text-center">The wooden structure of the house shows clear signs
of decay, with the once sturdy beams now soft and crumbling to the touch. The wood has
darkened in color, with patches of mold and mildew spreading across the surface. In some
areas, the wood is visibly warped and cracked, with sections flaking off and disintegrating
into dust. The corners and edges of the wooden planks have begun to rot away, leaving
gaps and exposing the inner layers. The smell of dampness and rot lingers in the air, and
the house's framework appears weakened, as if it could give way at any moment.</p>
        </div>
    </div>
    <div class="row mb-4">
        <div class="col-lg-8">

        <div class="col-lg-4">
            <p class="text-center">Termites have infested the wooden structures of the
house, leaving behind a trail of destruction. The wood appears hollowed out, with visible
tunnels and galleries carved through beams, floorboards, and walls. The once sturdy
framework is now brittle, crumbling at the slightest touch, and riddled with small holes.
Piles of fine, sawdust-like material known as frass can be found around the baseboards, a
telltale sign of their activity. In some areas, the damage is so severe that the wood has
collapsed, compromising the integrity of the house. The infestation has weakened the
structure, making it unsafe and requiring extensive repairs.</p>
