

## Jumpstart Javascript Task

Javascript is an important part of modern web development. In this example it is used to dynamically create elements and insert it into the web pages' DOM (Document Object Model). Here, the content created an list of the Top 10 Cap type as found here <https://www.onlineclothingstudy.com/2020/10/17-different-types-of-caps/>.

Here are the **Top 10 Cap Types**:

*List is empty*

Use the button below to call the javascript function that creates the *Top-10 Cap Types List* and displays it

Create and Display Top 10 Cap List

Reset List
