IntroductionDataPicturesStoriesSummary

dKin Caps

A young and inspiring organisation whose primary purpose is to bring you the highest quality headwear available.

Introduction

This is the simple page that shows a number of bootstrap components and the styles they provide to enhance plain HTML content - while also supporting a responsive display (screen resizing).

Firstly, at the top of the page, within a `<header>...</header>` section, it is common to have the **navigation** and some form of **banner / heading** content. Here we have a list using the Bootstrap `<nav>...</nav>` component in a container with five links to different parts of the webpage, with a blue (`bg-primary`) background and white (`text-white`) text. While a second `container-fluid` with a light blue (`bg-primary-subtle`) holds the **banner** details in a centred column of width 8 (`col-sm-8 mx-auto text-center py-5`) and comprising a title of the page and leading sentence.

Next is the `<body>...</body>` section that holds the **content** of the page. The content includes the following sections: Introduction (this), Data, Pictures, Stories and a Summary. The table content is formatted, while the pictures and stories of ice creams applies differing responsive layouts.

The final section is a `<footer>...</footer>`.

Note that each section has a hyperlink to the **Top** of the document for navigation.

Top

Hat Usage Data

In this section of the page, we have a nice table with some data from a survey conducted in 2013 as published in the paper 'A study on Hat User Habits and Their perception of the Product Form'. The table below is styled with the bootstrap classes `table table-striped-columns table-hover`, and the `table-primary` applied to the table header `thead`. Some rows in the table also use the `colspan` control. Note, the table also includes a caption and is constrained to 10 columns on wider screens and all 12 columns on small screens (i.e., `col-md-10 col-12 mx-auto`).

Pictures of Hats (Responsive Layout)

Below are some nice pictures of hats and caps, license-free images downloaded from the website [Unsplash](#). These images are placed in a single bootstrap `row` `g-2` (where the `g-2` adds a gutter size 2 between the images) composed of columns using a combined `col-sm-4` `col-12`. The `col-sm-4` forces 3 images to be in a row on all screen sizes **except** very small ones (<576px) where the `col-12` forces the images to use all 12 column grid units and stack each image on top of each other. Each image has the class `img-fluid` applied to it, allowing it to resize to the size of the column.

Hat Stories

The following three images and text are each held within **div** block that the class attributes **p-4 mb-4 bg-primary-subtle rounded**, to set the padding, margin below, background colour and corner shape, respectively. Each Image & Text holds a **row**, with the text assigned to 7 column units **col-sm-7** and the image assigned to **col-sm-5**; allowing the text and images to span 5 and 7 column units respectively on screens greater than 576px units. Added to each of these two columns is the **col-12**, which says when the screen is smaller than 576px, it will then use all 12 columns grids for each image and text, allowing them to be stacked on top of each other.

Sun Hats by Adiran Siaril

Here, the class **img-fluid rounded** has been applied to the image. The title above uses **<p class="lead">** to make the text stand out. While this text uses the **<p class="small">** to distinguish it from the normal paragraphs.
