Task: Proposing Responsive Design Changes

Objective:
Based on the user stories developed in Task 8.2P, propose changes to enhance the responsiveness and usability of the pet shop webpage. This task will help you translate user needs into actionable design improvements.

Task Description:
Using the user stories from Task 8.2P, you will:

1. **Propose Responsive Design Changes:**

   o **Navigation Menu:** Suggest improvements to make the navigation menu accessible on all devices. Consider aspects such as the placement, visibility, and usability of the menu.

   o **Layout and Content:** Recommend changes to adjust the layout and content for various screen sizes. Focus on how content is presented and how it adapts to different devices.

   o **Images and Media:** Propose solutions for resizing and scaling images to ensure they display correctly on different devices. Consider how images will adjust to various screen resolutions.

   o **Interactive Elements:** Suggest enhancements for interactive elements (such as buttons and forms) to improve user experience. Think about interactions, transitions, and overall usability.

2. **Link to User Stories:**

   o Ensure your proposals are clearly linked to the user stories developed in Task 8.2P. Explain how each proposed change addresses specific needs identified in the user stories.

What Will You Submit?
You should submit:

- **Document:** A document containing:

   o **Proposed Changes:** Detailed proposals for making the webpage more responsive and usable, including explanations for each suggested change.

   o **Connections to User Stories:** A section explaining how your proposed changes address the needs identified in your user stories.
