Task: Creating User Stories

Objective:
Develop user stories to identify the needs of different types of users for a pet shop webpage. This task will help you understand user requirements and set the stage for proposing design improvements in the subsequent task.

Task Description:
You are provided with the non-responsive pet shop webpage (https://personal-sites.deakin.edu.au/~arts/nonresponsivewebpage.html) or see **Resources** on OnTrack. Your task is to:

1. **Create User Stories:**

   o **Mobile Users:** Describe the goals and needs of users accessing the webpage on mobile devices. Consider aspects like ease of navigation, readability, and interaction.

   o **Tablet Users:** Describe the goals and needs of users accessing the webpage on tablet devices. Focus on user experience, layout adjustments, and touch interactions.

   o **Desktop Users:** Describe the goals and needs of users accessing the webpage on desktop devices. Address aspects such as detailed content display, navigation ease, and overall usability.

2. **Focus on Usability and Accessibility:**

   o For each user story, detail how the user interacts with the webpage and any specific needs they may have. Consider factors like accessibility, ease of navigation, and content readability.

What Will You Submit?
You should submit:

- **Document:** A document containing:

   o **User Stories:** Clearly written user stories for each identified user type.

   o **Detailed Descriptions:** Explanations for each user story, focusing on usability and accessibility.
